EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. In the specification,

On page 4, in line 3, "53" has been replaced with --55--.

3. In the drawings,

Figure 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

REASONS FOR ALLOWANCE

4. The following is an examiner's statement of reasons for allowance:

As per claims 1-3 and 5-6, prior art of record does not teach or fairly suggest a method for testing a digital circuitry through effecting a paired data loop-back from a first buffered output to a first buffered input while executing at least part of the test through using a Built-In-Self-Test methodology. In particular, the loop-back is effected from the first buffered data output to a buffered control input, from a buffered control output to the first buffered input, or both. Neither does prior art of record teach or fairly suggest that the buffering is associated to executing a conversion between a digital full swing internal signal and an analog low swing signal with respect to core circuitry of the digital circuitry.
